

Spicy Curry Safety Announcement and New Parts!

In a few cases over the last several years we have seen the potential on the Bosch-equipped Spicy Curry for the chain to roll off of the upper chain pulley wheel and subsequently damage the frame's chainstay. To resist this damage, **we have sourced a self-adhesive steel chainstay protector that is to be installed on every bike that does not yet include this part.** We will be including this piece **free of charge** and it will be available at your local dealer. We will send one directly to you for installation if you prefer. Please contact us with **your name and street address** and reference the **Bosch-equipped Spicy Curry Safety Announcement.** We will require your serial number to verify the model.

Going forward, all Spicy Curry bikes will have this chainstay protector installed but we want to do everything we can to make sure all past bicycles have this part installed. Again, this announcement applies only to the Bosch-equipped Spicy Curry bicycles currently on the road that do not already have the part installed.

We're also happy to make the current Spicy Curry's Chain Guard available for sale. We have created a kit that includes all parts and hardware necessary for its installation on past and current models alike. It will be priced at \$60 and available for sale by the time you're reading this announcement.

Below you'll find detailed instructions that outline the correct installation of both the Chainstay Protector and the Chainguard.

Please feel free to contact us if you have any questions at info@yubabikes.com

Thank you again for your attention!
